

Leading Edge Digital Educator

Digital education is part of every classroom today. If you are looking to advance your technology in education skills and understanding of effective technology integration, then this course can help. The Leading Edge Alliance—a group of nonprofit organizations, universities, and governmental bodies—has developed a certification program for K-12 teachers. The certification is a national program to prepare teachers and instructional leaders for digital education. Leading Edge Digital Educator Certification curriculum is based upon the National Education Technology Plan, Common Core State Standards, and the National Educational Technology Standards for Teachers (NETS-T). Completion of the program will result in a portfolio of technology-enhanced projects demonstrating learning activities that encourage students to think critically, communicate, collaborate, and create.

Learning Objectives:

- pedagogy and technology connections
- digital literacy and citizenship
- data literacy
- curation and creation
- communication and collaboration
- learning environments

Audience: Teachers, EdTech, Administrators
