

Leading Edge Professional Learning Leader

Launched in 2014, Professional Learning Leader certification focuses on those who provide professional development to educators across all curricular areas. The curriculum includes ISTE Standards for Coaches. Participants will integrate contemporary technology into leadership and professional learning practices using web-based software and resources that serve adult learning objectives and educational goals. This class includes both theoretical and experiential components; participants will explore and research examples of effective practices in 21st century learning environments, but will also spend a substantial portion of course time developing educationally meaningful and personally relevant products to support your role as a leader.

Learning Objectives:

- Professional Learning
- models of Professional Learning
- developing Community
- digital Literacy and Citizenship
- developing and Implementing a Vision
- professional Learning Environments

Audience: Teachers, EdTech, Administrators
